
a
no lag, $z = 1.00$
lag 0–5, $z = 0.18$
shifted distance $\min_{|h|\le 10} d_{jk}(h)$
Euclidean distance d_{jk}
z
warp-step probability p
b
lag 0–5, $z = 1.00$
+ local warp ($p = 0.9$), $z = 0.57$
DTW distance d_{jk}^{DTW}
shifted distance $\min_{|h|\le 10} d_{jk}(h)$
warp-step probability p
$|\tau_j - \tau_k|$ (samples)
